Cengar Lubricators are essential in prolonging the life and performance of all Air Tools.

Using Cengar Lubricators helps to reduce maintenance costs and prolong the life of your Air Tools.

- All **Pneumatic Tools** require lubrication & most in built ones are very basic.
- Cengar Lubricators provide a rugged reliable means of ensuring **clean, dry & lubricated** air giving maximum protection for your tools.
- A pressure controlled or standard unit is available.

**CENGAR DRI AIR UNIT & DRI AIR REGULATOR**

Sizes available:  
250ml bottle  
5ltr bottle  
25ltr container  
250 ltr drum

**CENGAR GREEN OIL**

- Cengar Green Oil is a low viscosity Air Tool oil developed to provide **essential lubrication** and is ideal for all air driven tools, particularly where high pressure sliding friction is present.
- It **emulsifies** with water found in air lines & contains a rust inhibitor to **prevent corrosion** when the saw is not in use.

- A specially developed oil used to **remove dirt, moisture** and oil residue quickly from the inside of all air tools and motors.
- This "**service in a bottle**" reduces the need to dismantle tools and is available in a 50ml dropper bottle and 1 litre containers.

**MS CLEANER**

# FALL ARRESTOR

- Our new fall arrestor has been designed to give added **safety** when working at **height**.
- To be connected to a spring balance.
- Designed to **protect** both the **people** working below and the **tool** itself if the saw is dropped.
- It can be fitted easily to existing **Cengar Saws**.
