

# LXS Level Crossing Surveillance

Surveillance system for the detection of any obstacles in the level crossing

The level crossing obstacle detection system detects all objects in the controlled area of a level crossing, in order to prevent a train colliding with an object such as a vehicle or people on the crossing.

## LXS Level Crossing Surveillance

*Surveillance system for the detection of any obstacles in the level crossing*

The level crossing obstacle detection system detects all objects in the controlled area of a level crossing, in order to prevent a train colliding with an object such as a vehicle or people on the crossing.
