

Nencki equipment for rail welding plants

Nencki

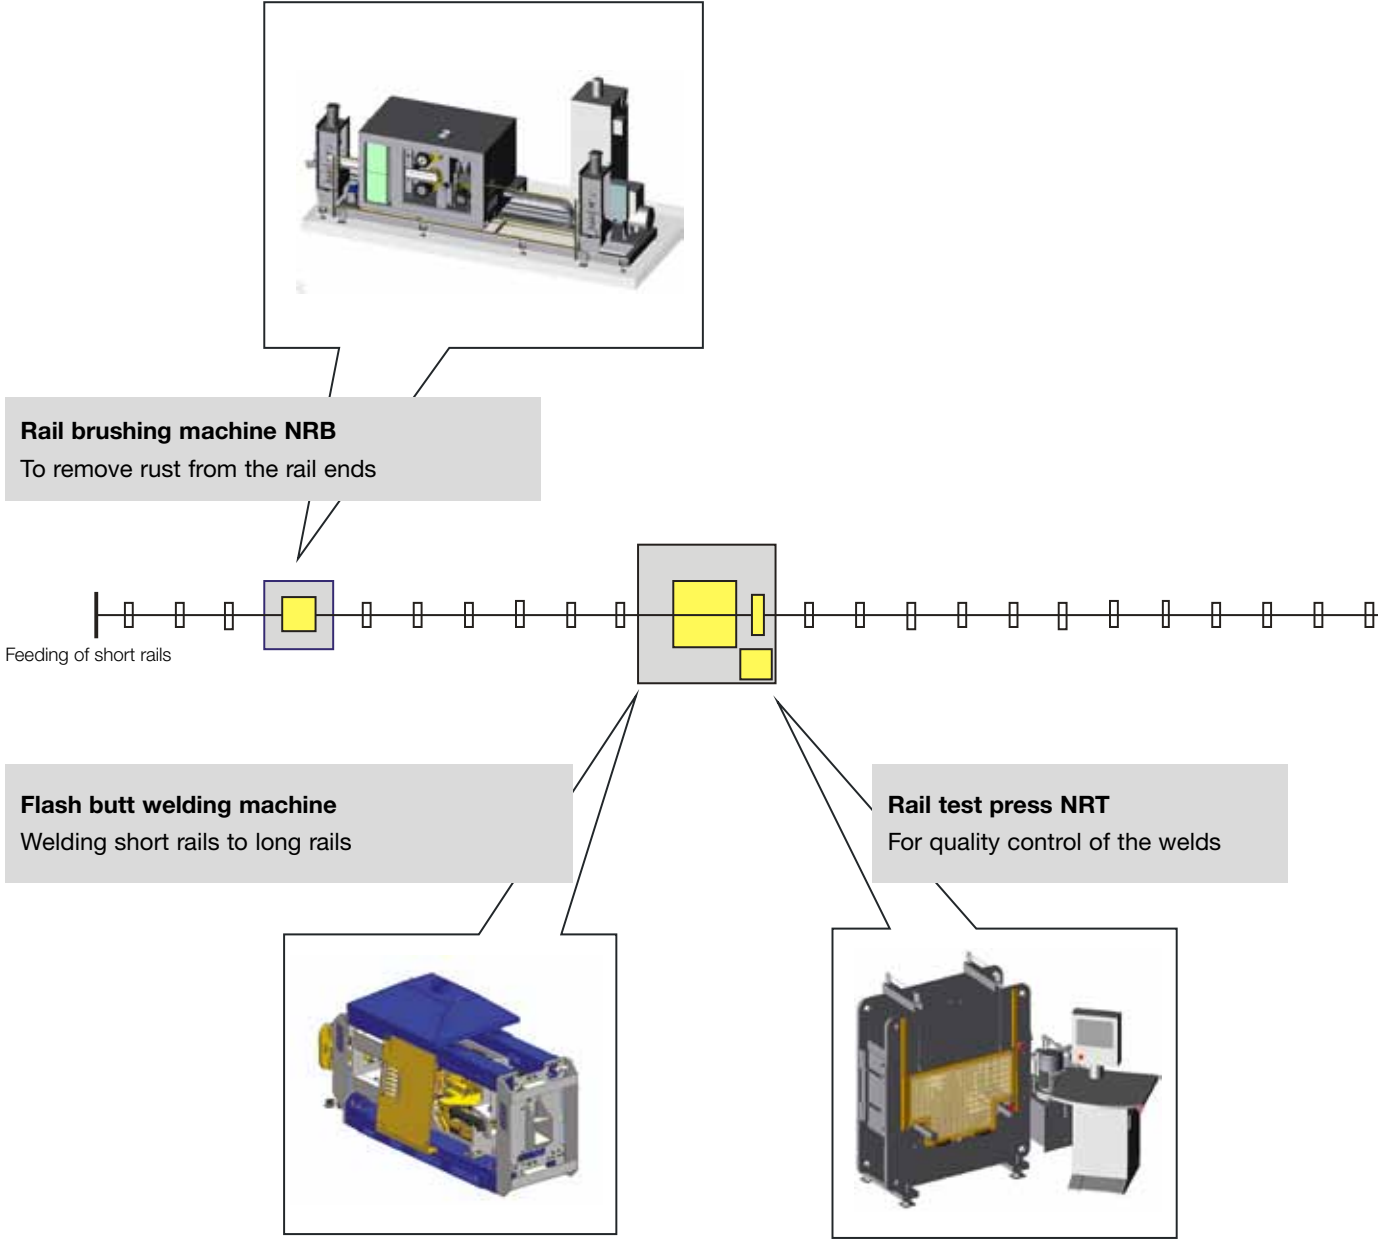

From individual machines to complete solutions

Nencki offers complete solutions for machines for long rail welding plants, including rail conveyor systems and superior controls for the process flow. With a complete range of equipment for producing long rails, Nencki has optimal solutions for specific customer requirements.

Rail processing

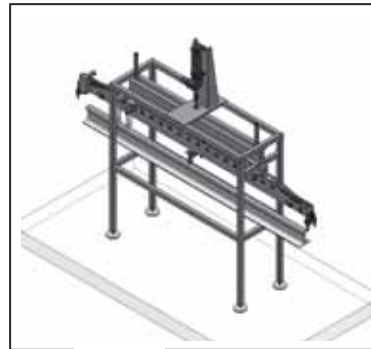

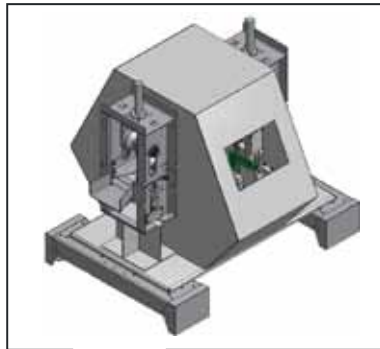

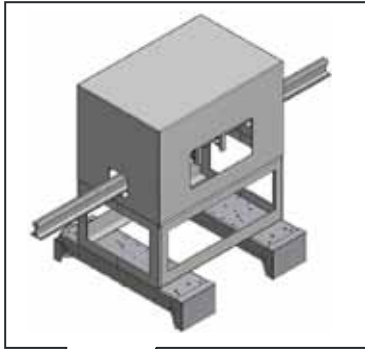

Complete rail welding plant from Nencki

Rail cooling NRC

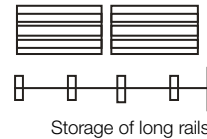

Cooling of rails for the further process

Final check by external measuring system or ultrasonic testing

Rail milling machine NRM

To remove weld burr on the bottom of the rail foot

Storage of long rails

4-way straightening press NRS

Alignment in horizontal and vertical direction

Rail grinding machine NRG

To remove weld burr on the rail head

Rail profiles up to UIC68

Short rails: 10 m, 25 m, 50 m, 100 m, etc.

Long rails: 200 m, 250 m, 500 m, etc.
