Welding Joint Grinding Machine

PRECISE GRINDING
COMPLETE
BY PROFILING.

E³

For grinding welding joints and for resurfacing the complete rail head.
Can also be used in cutchutes and for grinding grooved rails and crane rails.

THE ADVANTAGES, YOUR BENEFITS.

Simple and practical

- Simple operation, perfect control in power mode
- Interchangeable grinding system for various applications
- Easy changing of ring wheel thanks to quick lock
- Non-slipstanding carrying handles allow for easy transport and easy storage
- LED lighting
- Ideal for use in tunnels and other areas

Lightweight machine. Flexible grinding

- The motor power is electric motor in the range 1000W for best grinding
- No startup time
- Rotational speed can be adjusted at specific hand wheel as required, without the use of any tools
- Grinding throughout all types of materials of continuously grinding, cleaning or rail profile, groove grinding wheel etc.

TECHNICAL SPECIFICATION

Size	61.50 cmx45 cmx100 cm
Weight	21.00 kg
Weight	
Machine	From 40 kg
Battery	From 12 kg
Power supply	230 V
Case roller bearing	SKF seal
Dimensions (L x W x H)	2000 x 1000 x 900 mm
